

# Job Title: Electrical Responsible person (Elektroinstallatør)

Requisition ID 5181 - Posted 09/24/2021 - Norway - Stavanger - Engineering - Permanent - Full Time

## Do you want to solve tough challenges for the global energy industry?

At Aker Solutions we are changemakers and accelerators. With a proud history of delivering complex projects to the oil and gas industry, we are looking for talented individuals to help us shape the path towards a sustainable energy future.

In our **Stavanger** office, we are now looking for an **Electrical Responsible person**(Elektroinstallatør) with the right attitude and professional pride.

## What will you be doing?

- Manage and execute the overall responsibility for all electrical, instrument, telecom and Ecom installation work within EEM, Engineering, Subsea centers in Norway
- Be the electrical company's most important person to ensure that the company delivers electrical and fire-proof electrical systems
- Professionally responsible for all EIT work within EEM, Engineering and Subsea are engineered, designed, and performed according to laws and regulations. This involves High and Low voltage electrical, Instrumentation, Telecom & Ecom activities
- Mapping of competence in the company, as well as planning and implementation of necessary competence development
- Use of apprentices for work related to electrical installations, including a routine for appointing a supervisor / mentor
- Use of unskilled people for work related to electrical installations, including a routine for appointing a supervisor / mentor
- Ensure that the company uses qualified personnel for the individual work assignments
- Ensure that employees have access to necessary tools, protective equipment, and routine on checking it.
- Ensure that a routine is prepared for the choice of working method at the workplace (fse)
- Ensure that a routine is drawn up for the designation of LFS / AFA
- Safe job analysis (SJA) at the workplace
- Implementation and documentation of risk assessment related to personal safety for each assignment

## We think you should have:

- Higher education and have passed your own test administered by the Directorate for Civil Protection and Emergency Planning or authorized by the Directorate
- Minimum 5 years relevant experience with work or electrical engineering in offshore oil & gas project execution
- Good knowledge of rules/regulations, standards and preferably the company`s technical requirements
- These include: NORSOK, NEK, Company procedures, checklists and processes, Client codes and standards, HS&E Regulations, IEC Directives and Atex
- Acts as a role model for the employees by showing how it is desired that the employees should act to create good attitudes and professional pride
- Create a good electrical professional environment with respect for the regulations the company must comply with

- Understanding how the business can be improved through digitalisation, data can be visualised, interpreted, and used for recommendations and decision making

## More reasons to work with us:

- Competitive compensation and benefits
- Good work/life balance
- Positive work environment with challenging tasks
- Development opportunities
- Fantastic office building with onsite canteen
- Immediate proximity to public transport, restaurants and shopping
- Free gym membership at state-of the art training facilities
- Excellent health services provided by Aker Care
